

## elliTek Advances to Blue-Level Partner with SCHUNK in Tennessee

elliTek is proud to announce that we have achieved **Blue-Level Partner status with SCHUNK for the state of Tennessee.**

This milestone builds on our previous CAPS partnership and reflects the continued growth of SCHUNK automation solutions across our territory—along with elliTek’s ability to provide application-driven technical support for robotics, gripping, and advanced manufacturing environments.

Blue-Level status strengthens collaboration between elliTek and SCHUNK, enabling deeper technical alignment, expanded application support, and closer engagement with manufacturers, OEMs, and machine builders throughout Tennessee.

*“Advancing to Blue-Level Partner status with SCHUNK reinforces our commitment to delivering proven, high-performance automation solutions backed by real application expertise,”* said **Brandon Ellis**, Founder of elliTek. *“This partnership allows us to support our customers with even greater confidence as they design and deploy automation systems.”*

SCHUNK’s portfolio of gripping systems and automation components plays a critical role in robotics and precision manufacturing—areas where reliability, flexibility, and performance matter most.

*“elliTek has consistently demonstrated strong technical capability and a customer-first approach,”* said **David Simerly**, Tennessee Territory Sales Representative at **SCHUNK USA**. *“Their elevation to Blue-Level Partner reflects the value they bring to customers across the state.”*

With this new partnership level, elliTek is well-positioned to help Tennessee manufacturers evaluate, specify, and implement SCHUNK solutions that deliver real production value.
