

CKD's ABSODEX Lineup

can be used for any application

Excellent for Assembly/Inspection

AX1000T Series

Most suited for Precision Alignment/Positioning

AX7000X Series

High Precision
(Repeatability)

High Accuracy
(Runout/Indexing Accuracy)

Allowable Load Inertia
(Moment)

**CKD
ABSODEX
LINE UP**

High Speed Operation

Variation
(Torque, Interface)

Magnificent High Speed Operation

AX2000T Series

Superb for Assembly/Conveyance/Index tables

AX4000T Series

Space Saving

Great for miniaturizing equipment

AX6000M Series

All actuators are absolute types

3 user friendly features of ABSODEX

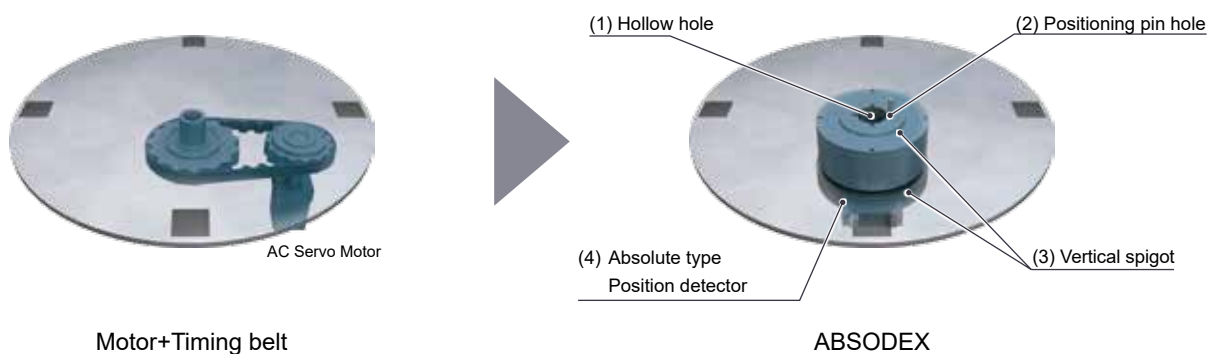

Flexible Operation

With an abundant programming function - realize the operation that you want.

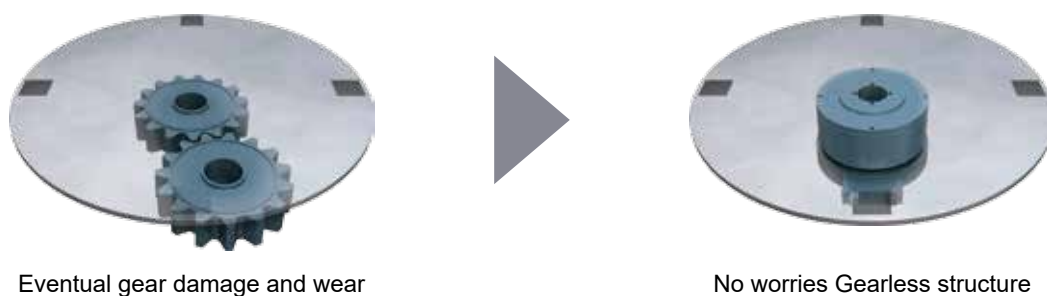

Reduce Workload and Save Space

A simple design with 4 standard useful features.

High Reliability and Maintenance Free

No more damaged or worn gears from a gearless design.

DRIVER

Compatibility

Freely combine drivers and actuators

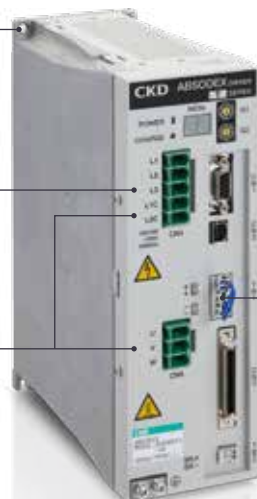

TS/TH Drivers

(AX1000T, 2000T, 4000T)

Mounting holes added

Separate main power
and control power

Use of connectors

Terminal for the Safety function

With the STO Function (Safe Torque Off), one
can easily incorporate it with the drive circuit to
cut off power.

MU Driver

(AX6000M)

Uses 24 VDC
Realized smaller
dimensions.

Uses
connectors

Main power and
control power
are separate

Mounting holes

Separate main power
and control power

Uses connectors

XS Driver

(AX7000X)

Great Usability!

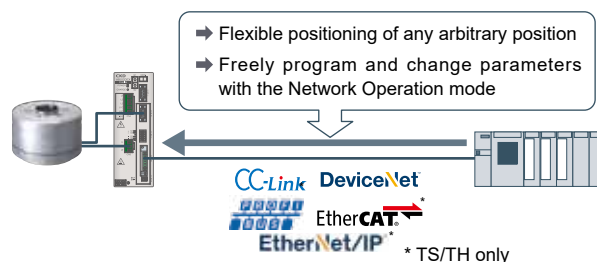

- No backup batteries needed
- Freely combine drivers and actuators

Convenient functions

- Various functions for your usage!
- Segmented position output function

Use IoT on your equipment!

- Monitor function (TS/TH/XS wiresaving serial communication)
- Network Operation mode (XS wiresaving serial communication)

SOFTWARE

Operation made easier

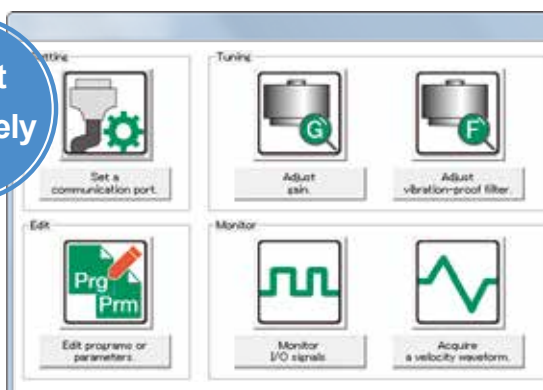

The AxTools is here to help you from operation settings to adjustments.

From experts to novices, the **AX Tools** is user friendly

Intuitive operation with a simple and easy to use interface.

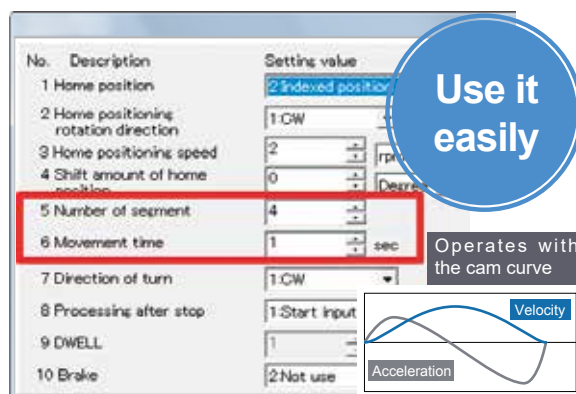

Freeware

Use it intuitively

Desired conditions can be instantly implemented.

Use it easily

In equal segmental programming, only the number of partitions and travel times need to be input.

Industry's 1st! Equipped with an AI that **supports adjustments**

Conventionally...

- Tuning relied on experts
- Overseas startups were unstable
- Results of adjustments were difficult to judge

Anyone can use it

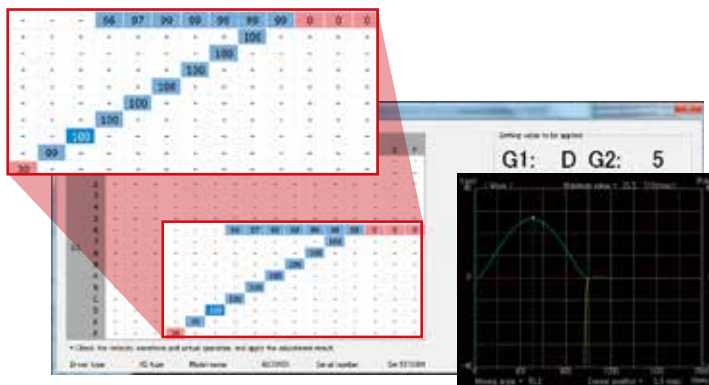

Adjustments made by the AI

Input the conditions

Click

Data is acquired automatically and the most suited tuning is advised with a score

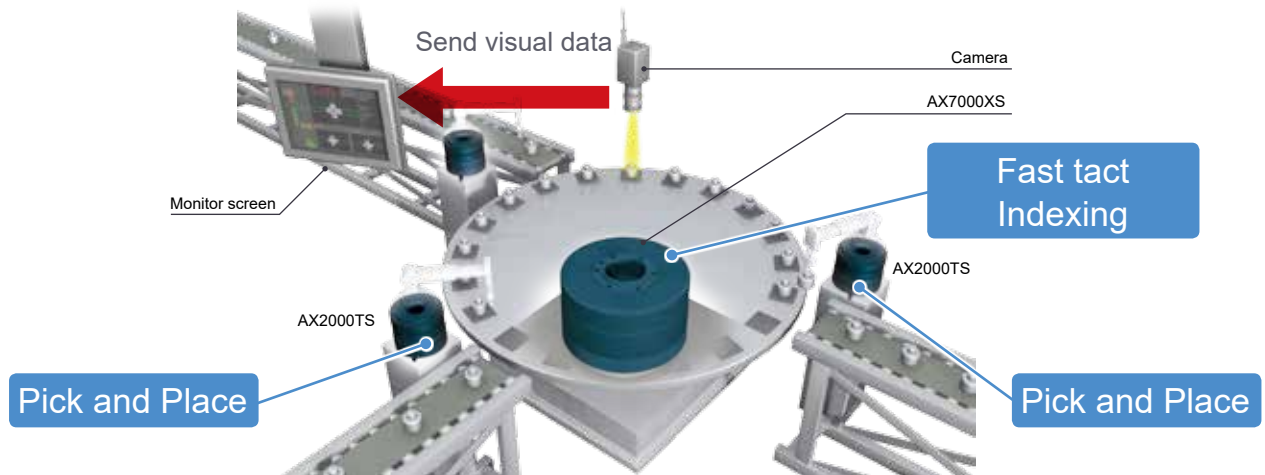

Also, simultaneous confirmation of the operation wavelength is possible

USE CASE

Operation examples

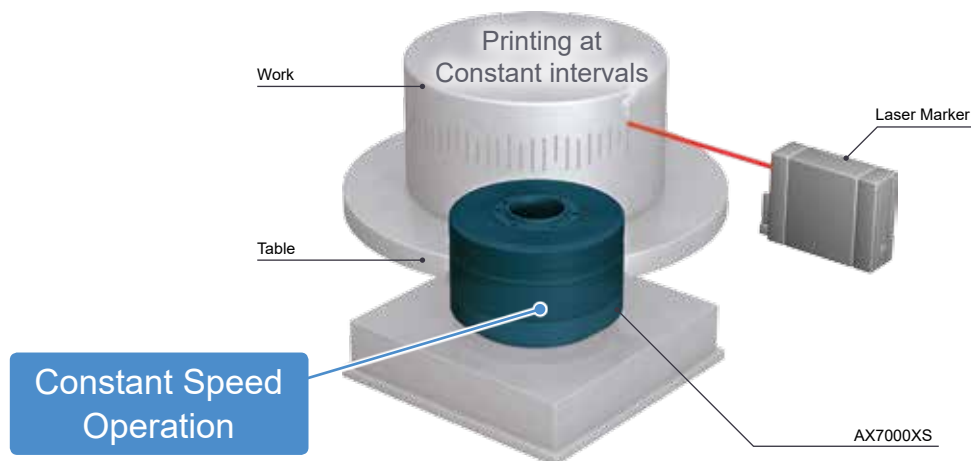

Electronic Parts Inspection

Operate the AX with multiple machines and achieve fast tact

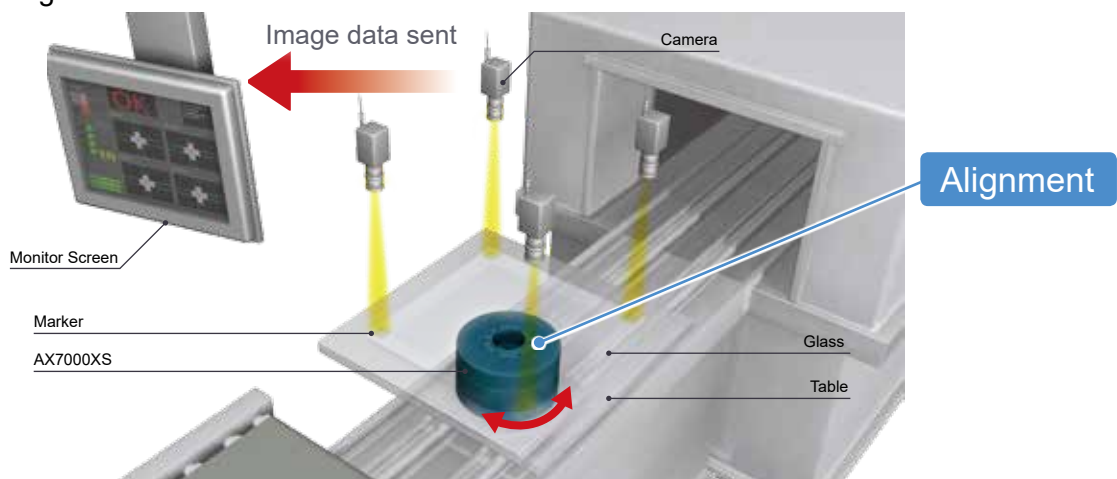

Laser Labeling of Workpieces

Laser marking is done at constant increments.

Laser Labeling of Workpieces

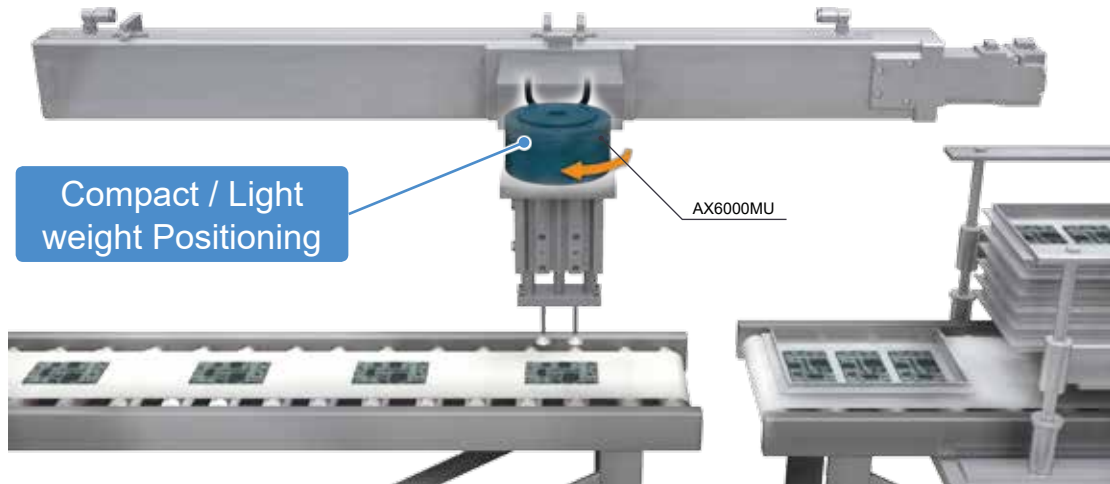

Laser marking is done at constant increments.

USE CASE

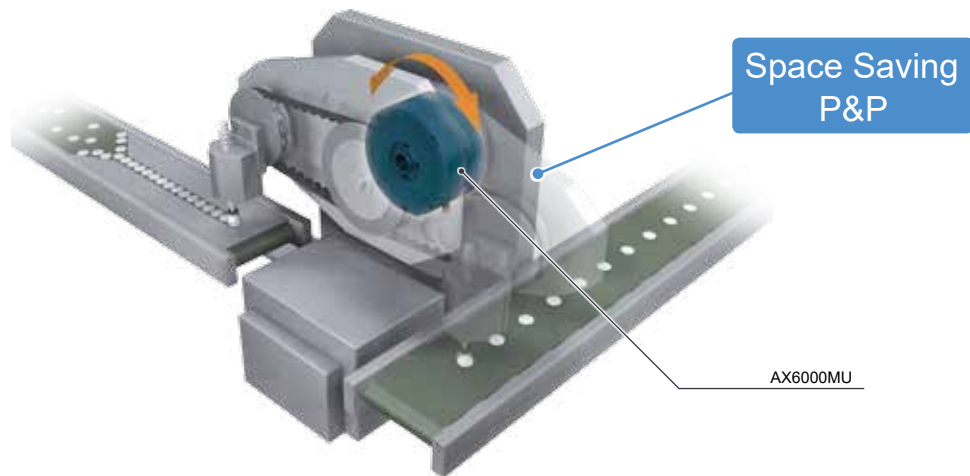

Conveyor of Electronic Substrate

Rotate electronic substrates by 90°

Pick and Place

Work is conveyed using an equipped parallel displacement mechanism.

Assembly, Inspection Machines

Conduct setup changes without time loss

Mass Customization
Compatible with
Manufacturing
